

## Knowledge is Wealth President's Message SY Q3

Dear ISHRAE Members,

Greetings!

Wish you all a very prosperous healthy and Safe New Year 2023.

We are now into the 4th quarter having gone through 3 quarters of this dynamic society year (SY 2022-23). From an athlete point of view, we are now entering the home run period in the final 3 months of this Society Year. Indeed, a phase of 9 months full of chapter programs and many National programs by chapters has just gone by and even before we could wink the time has gone past. Yes, these past 9 months have been busy days at work.

We had memorable 3 days at Ahmedabad early in the month of December and very lovely to see the ISHRAE team putting up a grand Refcold India 2022 Exhibition a proof of ISHRAE Unity. The Seminars and Workshops were outstanding and wonderful presence of Asian Heat Pump and Thermal Storages Network with 7 participating countries India, Japan, China, Korea, Indonesia, Vietnam, Thailand representatives and the full day technical sessions were outstanding source of Knowledge sharing.

Similarly, we also had Dairy Seminars, INDEE+ Seminars spearheaded by IIR – International Institute of Refrigeration, Fire Safety Seminar by FSAI and many more parallel sessions. Overall, the 3 days and 10 Sessions were full of knowledge sharing attended by many Knowledge seekers.

We had the presence of Gujarat Cooperative Milk Marketing Federation MD Dr R S Sodhi, Mr Asheesh Fotedar COO of NCCD, Mr Didier Coloumb of IIR, Mr Amit Vyas MD Amul Dairy, Mr JS Haider Principal Secretary Climate Change Dept GOG, and so on. We had great number of visitor presence on all the 3 days of the exhibition.

We had another major National Program Racon that happened in the 3rd week of December a flagship program by our Kolkata Chapter well organized where in Industry veterans with over 50 years of experience were facilitated. A great service by this chapter of ISHRAE to honor the presence of such great dedicated individuals who have the passion in their minds for ISHRAE forever.

These 9 months saw more programs all around with many chapters going for national programs such as Symposia or the Theme based National Program Urjavarani / Acreserve /

**PRITHVI**  
(Earth)

**PARYAVARAN**

**PARIVARTAN**  
(Transformation)

Pharma connect. It will be of great interest to know that in these 9 months the chapters have completed close to 950 Programs. On average we can say there are 4 programs being conducted by chapters of ISHRAE every day in one corner of India or other. I am sure this is a phenomenal achievement.

The fruits of this objective of knowledge sharing have led us to the situation of adding close to 1200 new members and an equal number (1200+) of renewals/Sustenance as on date. We are truly supported by student chapters close to 5000 members and 250+ student chapters all over India. This again shows the member faith in ISHRAE and the benefits of being part of this strong 42-year-old society.

Currently with all your support we have been able to start 3 International Subchapters. **ISHRAE Bangladesh Subchapter** chartered in the month of August 2022 and **ISHRAE UAE Sub Chapter** to be chartered on Jan 25, 2023, and **ISHRAE Qatar Subchapter** on Jan 28, 2023.

Apart from the above we have **domestic subchapters** chartered at **Tiruchirappalli, Kollam, Calicut, Salem & Hubli** which will make sure ISHRAE flag is held high at 49 cities in INDIA and 3 countries Overseas.

We are now looking forward to conducting our Theme based program Urjavarani at International locations Nepal, UAE and Qatar while Kenya and Nigeria have already been completed.

We had the honor of signing MOU with UNEP and this would signal the place ISHRAE enjoys in the eyes of such international organisations where we play an influential role in the climate control programs. We also signed an MOU with the Institute of Valuers, and MOU with CAHO (Consortium of Health care Organisations) and all this significantly adds to our growing stature as a Premier HVACR Society.

Three excellent books were launched from ISHRAE Publications **Health care Guidebook** and **Cold storage design Guidebook and Ventilation and Cooling of UPS and Battery Rooms** which are seeing a huge demand from our members. There are more in the offing and shall be published soon by ISHRAE. Recommend visit our website [www.shop.ishrae.in](http://www.shop.ishrae.in) for more details.

We had a very fruitful BOG meeting at Kasauli near Chandigarh and the nominations for the next Society Year officers have been announced. The election Ballots have also been circulated and I urge all members to cast their votes.

In this final Quarter we shall be having the Premier Exhibition by ISHRAE **ACREX INDIA 2023** at Mumbai from March 14 – 16, 2023. Please block your dates and come and witness the industry advancements after a gap of 3 years and unique in many ways.

**ARISE AWAKE AND DO NOT STOP UNTIL THE GOAL IS REACHED.** This has been my Mantra which I have been advocating for Self and all our volunteers to ensure that our Society Theme for this year **P3 - Prithvi Paryavaran Parivartan** is taken forward in every possible way by our chapters to support our National Mission of Net Zero Emission by 2070.

Let us all believe in

**Coming Together is a Beginning**

**Keeping Together is Progress and**

**Working together is Success.**

Best regards,

**N.S. CHANDRASEKAR**

National President- ISHRAE
