

Sharing is Caring President's Message SY Q1

Dear ISHRAE Members,

Greetings!

We have completed the first quarter of this society year. It was an exciting period and many challenges all around. Especially we were woken up from slumber with a near return to normalcy from industry, business opportunities, possibility of physical face to face meetings and improving networking in ISHRAE which were absent past 2 years. Now all activities are returning at the same time which in some ways posed a challenge. But I suppose as HVAC industry professional and a true passionate Ishraeite we are always ready for the challenges.

The first quarter addressed chapter installations in 44 cities where in the newly elected core working committee officers took charge and started planning for the rest of the society year.

It was phenomenal to see all our teams working in unison to produce wonderful contribution towards the growth of ISHRAE. To name a few our 4 pillar Standing Committees which are the foundations of strength - Membership, Programs, Students and K12 reinforced the trust the members have in ISHRAE.

Our membership community is increasing with 900+ new/renewals so far in this society year. Similarly, our Student member numbers have started steadily rising to 1500+ members. Our chapters have been very creative in ensuring knowledge dissemination through programs by conducting 650+ programs in the first quarter. Our K12 team has ensured along with Youth the society theme of this year "**Prithvi Paryavarán Parivartan**" which translates to "**Earth, Environment Transformation**" is taken forward in schools and have ensured that Tree plantation activity is taken up and also ensuring the children are led to thought process of caring for Mother Earth.

Our Various Committees Technical Standards Refrigeration Education and Environment Protection and Safety are all working to ensure the mission and vision of ISHRAE is taken forward. In the remaining period of the Society Year the outcome of these developments will benefit our members as well as the HVAC fraternity.

PRITHVI
(Earth)

PARYAVARAN
(Environment)

PARIVARTAN
(Transformation)

We have always had good support from the Youth who are as vibrant as ever and from Women in ISHRAE who this time are working to make a mark which will be for the benefit of the industry by planning a major full day event.

As ever our support teams Marketing and IT are silently supporting all our activities and actions in a steady manner. Our advocacy team is planning a totally new phase of ISHRAE presence with Industry Associate Societies and Government which will have more joint working strategies etc. We have signed MOU with CTBUH – Council on Tall Buildings and Urban Habitat recently.

ISHRAE Research has sent out request for new proposals for Research though we already have four ongoing projects as ISHRAE is a keen contributor to HVAC fraternity in this aspect. We shall continue to request our members to support Foundation for ISHRAE (FIRST) by generous contributions which can take forward our dream of Research as the pillar of support for developmental activities of ISHRAE in every aspect.

We had very good interactive Regional Chapter Conference of 4 Zones North East West and South with excellent exchange of thought process and future planning. Similarly the National Board of Governors conference at Chennai was well represented by all chapters and National Chairs and was very informative and productive.

ISHRAE for the very first time is stepping on to International presence by approving formation of ISHRAE BANGLADESH Sub Chapter. I am sure with this beginning we will look for more chapters to serve interested overseas members in a more concentrated and inclusive manner. At the same time we have geographically expanded on the domestic sector too by the BOG approving Tiruchirappalli Sub chapter. Congratulations to both Bangladesh and Tiruchirappalli members.

We have more interesting information to our members.

Our premier world class international Exhibitions are back - **ACREX and Refcold**. Acrex 2023 will be held at Mumbai from March 14 -16 and Refcold 2022 will be at Ahmedabad from December 8-10. It will be my pleasure to have you all visiting the exhibition on these days.

I am of the firm believer in Team concept and together we can and we will. Let us remember my initial presidential address ending **ARISE AWAKE AND DO NOT STOP UNTIL THE GOAL IS REACHED**. There are milestones to achieve in ISHRAE and with the support of our teams and our dear members we shall.

Best regards,

N.S. CHANDRASEKAR
National President- ISHRAE
